Seminar Description

David H Paul Inc. Training:

DHP has trained over 20,000 water treatment professionals worldwide since 1988. Trainees include industry, government and municipal clients.

Seminar Description:

Advanced and expert level understanding of water treatment theory, monitoring and troubleshooting requires an excellent knowledge of water treatment chemistry and biology. However, many water treatment professionals have not had much formal training on water treatment chemistry and biology, which is what this seminar aims to address.

This advanced level course will provide you with the knowledge needed to understand a complete water analysis report and many of the common water treatment problems/issues faced.

The topics covered in this course include:

- Source Waters
- Water Contaminants
- Reading and Understanding a Complete Water Analysis Report
- Evaluating Scaling Potentials
- Evaluating Non-Living Fouling Potentials
- Evaluating Living Fouling Potentials

Who Should Attend?

Anyone involved in, or going to be involved in, the design, installation, operation, maintenance and/or management of a water treatment system. The information, tips and techniques presented apply to all water treatment systems and all industries, including POU-POE, municipal drinking water, beverage, power generation, pharmaceutical/biotech and semiconductors.

What You Will Receive:

Accredited training from David H Paul Inc., a world leader in high-tech water treatment training.

Training based on the extensive experience of the DHPaul trainers, who have trained around the world at countless facilities.

Eight hours of interesting, easy-to-understand theory, blended with practical application gained from years of training and operator experience.

Eight hours of the latest in multimedia training.

A highly illustrated workbook.

M/Tea, A/Tea and Lunch.

Certificate of completion.
